Projects

1. Spotify Clone (<https://transcendent-sprite-e7b5cf.netlify.app>)

Spotify is a music app. I have cloned this app using my skills of HTML, CSS, Javascript.

2. CRUD Application (<https://hitesh-364656.netlify.app/>)

Designed and implemented a dynamic react CRUD application, seamlessly integrating for seamless data handling, including form submission with data insertion to a mock API fetching and displaying data in AG-Grid, dynamic dropdown binding, and validation for an enhanced and user-friendly experience.

3. Digital Restaurant Website (<https://restaurant-digital-menu.netlify.app/>)

Developed an innovative restaurant website featuring interactive menus with “Explore” buttons for seamless user experience, allowing customers to view and add items to their cart.

4. Website Clones (<https://shlokab-landpage-design.netlify.app>)

Created responsive website clones utilizing HTML, CSS, and Sass, showcasing front-end web development and design proficiency. Above I have provided the link to one of my designs.

Professional Experience

6 months experience as Front-End Developer.
